

## RockSolid® Starting Platform Anchors

Never worry about loose platforms again! We have created a new anchor system with a “no wobble” guarantee.

The anchor securely “hugs” the frame and can be tightened with minimal effort. The RockSolid® Anchor allows for permanent or removable starting platform installation.

- Accommodates 2.5”/6.4 cm square tubing or 1.9”/4.8 cm round tubing
- Adjustable wedge assembly exerts continuous, even pressure on the post to eliminate platform movement
- Safe-T-Cap: utilizes the anchor’s wedge bolt to tighten and secure in place.

RockSolid® Anchor Safe-T-Cap
