

serious
EQUIPMENT

TAKE A MOMENT TO GET TO KNOW US. How we think and what we think are important. How can we improve the equipment that helps people get the most from their time in the water? It is a question that can keep us up at night, and it spurs us on in a quest to innovate. People who enjoy pools work here — from champion swimmers to folks who simply love water. We've found the best pool equipment ideas come from people who truly love pools, and that passion is reflected in the products we build.

We love how others enjoy pools. We love the sound of a pool when it's being used. The shrieks of joy or the roar of encouragement during a race. We love the look of the water, whether it's still or it's a mass of turbulence. We love how the cool water makes your skin tingle on a hot summer day. And how it enables mobility for those more encumbered on land. Yes, we love pools.

This mindset gives us a special perspective when it comes time to design pool equipment. It makes us better at minding the little things that matter.

For more than 80 years, S.R. Smith has had a singular focus: Create products that make the pool experience better for both swimmers and owners. If it involves a pool, chances are we've "seen it" and if there's a way to improve, we'll find it. We were the first to manufacture diving boards on a commercial scale. We were first to focus on salt-friendly products. Starting blocks are now designed with a track start wedge — a concept we improved by allowing the wedge to be tucked away when not in use. Our lane line storage reel with the largest capacity on the market saves deck space. Our comprehensive line of accessibility products helps ensure everyone can enjoy the benefits of being in the water. And for the people who design aquatic facilities and spec pool equipment, we have created configuration tools to make it easier to select what's needed.

That's how we think. This is who we are. Welcome to S.R. Smith.

ladders & rails

Ladders and rails are so common place that you barely think about them — but we do. Constantly. We know how important they are. They're functional, yet they have the power to add unique design elements that can make a pool special. So when you choose S.R. Smith, you are choosing ladders and rails that have the unique capacity to turn an ordinary pool into the extraordinary — without breaking the bank. If your design calls for ADA compliant rails or virtually any custom steel tubing deck accessories, look to S.R. Smith.

INDUSTRIAL STRENGTH — FINISHED FOR PERFORMANCE

We offer standard and custom commercial rails in wall thicknesses of .065", .109", .120" and .145" and outside diameters (OD) of 1.50", 1.625" and 1.90". Our rails are fabricated from 304 stainless steel, or 316L for a higher level of protection against corrosion. For the additional protection needed for salt chlorinator pools and to keep rails cool to touch, we offer two levels of coating protection — powder coating and our SealedSteel™ protective vinyl.

WetTraction™

Increased traction when wet. No more slippery rails.

StressLess™

Unique, chemically-bonded coating fully encapsulates stainless steel tubing and provides protective coating that virtually eliminates corrosion and stays cool, even in extreme temperatures.

Sealing Cap

Creates full encapsulation (shown pulled off).

CUSTOMIZE WITHOUT COMPROMISE

Just about the only limit to our custom rails is your imagination. No one else in the industry offers the degree of customization or the quick turnaround times you'll find with S.R. Smith. Our state-of-the-art rail manufacturing capabilities enable us to economically produce rails and ladders with fewer weld joints.

starting platforms

Whether you're running an elite swim program or teaching beginners, S.R. Smith has the right starting block for your facility. We offer six models, including a new FINA approved design that features track start wedges and side handles. And because we believe flexibility should be available to every aquatic facility, we've included options that are designed to accommodate pools with wide or parapet gutter configurations, narrow bulkheads or decks where space is an issue.

PLATFORMS FOR EVERY LEVEL

Our starting platforms meet FINA, NCAA, USMS, and USAS competition pool rules and regulations.

ELITE & COMPETITIVE MODELS

Legacy Launch: Single post, state-of-the-art design includes track start wedge and optional side handles. Side or back mount, and long reach models available.

Legacy: Single-post, back or side mount, with long reach model available.

RecordQuest™: Single-post, back mount, with long reach model available.

COMPETITIVE & RECREATIONAL MODELS

Legacy II: Economical dual post model is a practical choice for recreational facilities.

Universal: Multipurpose platform design with U-shaped step and platform provides wide starting space for beginners, as well as step/rest area for coaches.

Varsity Deluxe: Low profile platform that is ideal for beginning competitors.

ROCKSOLID™ ANCHOR

The secret to stability is our patented RockSolid™ Anchor, (U.S. Patent # 8033077). Available for most single or dual post models, this innovative, expandable wedge assembly exerts continuous, even pressure on platform posts to eliminate starting block movement or wobble.

CUSTOMIZE WITHOUT COMPROMISE

Our platforms are available in five powder-coated frame colors, with radiant white steps and footboards. We also offer a variety of customization options for facilities that want to show off their team spirit by placing team logos on the footboard, or custom powder coating frames and footboard tread to match team colors. Many models are available with side or back mounting steps, with a long reach version and a variety of backstroke start handle designs.

PEOPLE SAFE — BOTH IN THE WATER
AND ON THE DECK. THAT BEGINS
WITH HAVING THE RIGHT EQUIPMENT.**

lifeguard **equipment**

Pool safety is paramount. Our knowledge of the pool environment has led to the development of equipment that takes the guesswork out of pool safety. From lifeguard stands to high-capacity lane line reels, we offer the right equipment to help keep your decks and your swimmers safe.

LIFEGUARD CHAIRS

S.R. Smith manufactures eight styles of lifeguard stands to meet the logistical and safety needs of facilities from small hotel pools to large aquatic facilities. Each model is designed to address common needs found across a variety of pool environments. For facilities with multiple or large bodies of water, we created a stand seat that can rotate 360 degrees for maximum viewing capability. We manufacture permanent and portable styles, 30" low profile models, and a towering 8' Vista stand. Whatever your requirement, you'll find an S.R. Smith chair that's ideal for your facility.

PORTABLE MODELS

Low Profile: 30" and 42" seat height with 360 degree rotation and stainless steel base.

O-series: Unique circular, lightweight design, 30" and 42" seat height with 360 degree rotation and stainless steel base.

Standard: 6' seat height, two wheels for portability, 45 degree seat swivel and stainless steel base.

Vista: 6' and 8' seat height models with 360 degree rotation, two wheels for portability and stainless steel base.

FIXED LIFEGUARD CHAIRS

Cantilever: Slim design, 6' seat height with 360 degree rotation, with steel base ready for paint.

Guardian: Slim design, 6' seat height with 360 degree rotation, with stainless steel base.

Institutional: 6' seat height with 360 degree rotation, extended observation platform, and stainless steel base.

Outlook: 5' and 6' seat height with 360 degree rotation, with a powder-coated stainless steel base.

XL CAPACITY LANE LINE STORAGE REEL

Because an uncluttered deck is essential for pool safety, we offer the largest capacity lane line reel on the market. The powder-coated, stainless steel frame resists corrosion. Heavy-duty locking casters can swivel 360 degrees for easy maneuverability, and a handy eye-hook for securing the first lane line makes the XL Capacity Lane Line Storage Reel extremely functional.

diving boards & stands

120.10

Durability, longevity and safety are the hallmarks of S.R. Smith diving boards and stands. We've built our reputation on our ability to meet a myriad of facility needs with diving boards and stands that are affordable, and durable enough to withstand the test of time. So whether you are designing a new facility or need to replace a diving board, S.R. Smith has the solution.

DIVING BOARDS FOR ANY POOL

Our diving boards and stands have been designed with a variety of requirements in mind: pool specifications, user levels and budgets. Our wide range of diving boards and stands help ensure that your facility meets ANSI-NSPI-I 2003 Standards* for public swimming pools. This safety standard outlines which types of board and stand combinations are appropriate for a specific pool envelope.

DIVING STANDS:

Deluxe: 1 or 3-meter stands that come with stainless steel handrails, an adjustable fulcrum, and are primed and ready for paint. Options include back, left, right and dual mounting styles.

Steel Meter: ½, ¾ and 1-meter stands that come powder-coated in radiant white (1-meter requires handrails).

Econoline: 1-meter stand with back step, comes primed and ready for paint.

U-Frame: 12", 18" and 24" stands that are our most economical option.

AVAILABLE BOARDS:

S.R. Smith boards come in lengths from 8' to 16', and are designed for a wide range of usage levels as well as pool envelopes. We offer a variety of fiberglass-reinforced core styles, and one all aluminum board. Most board styles have a 250 lb. weight capacity, though we offer an extra heavy-duty style with a 400 lb. weight capacity. Boards are sold separately from stands.

All boards are available in radiant white and marine blue, though select board styles are available in additional neutral gray and taupe colors.

pool slides

Nothing creates a more universally embraced pool experience than a pool slide. S.R. Smith's slides are thoughtfully designed to deliver loads of pure pool entertainment, and will transform your aquatic facility into a favorite destination for kids of all ages.

HIGH-TECH MATERIALS

S.R. Smith's slides are manufactured with high-quality materials that resist fading and scratching so they retain their luster through years of heavy use. Our pool slides come in heights from just over 4' to the towering Vortex™ that tops-out at 10'7".

Sandstone Granite Grey Taupe Vortex Blue Radiant White

Not all colors available on all slides. Blue available in Vortex only.

CONFIGURED FOR SERIOUS FUN

Our best selling commercial slide, the Vortex, features a 19' corkscrew runway with a high volume water delivery system that promises to be a major attraction at any aquatic facility. It can be ordered with an open or closed flume, as well as in a staircase or ladder style.

SAFETY BUILT IN

From enclosed ladders to easy-to-grip rails to nonslip treads, safety is engineered into every one of our slides. And all S.R. Smith slides are fully compliant with the CPSC Safety Standard for Swimming Pool Slides (16 CFR 1207).

accessibility products

Aquatic activities benefit people of all ages and abilities, and S.R. Smith's full line of ADA compliant accessibility equipment helps ensure that everyone can get in and out of the pool safely. In addition, we have been at the forefront of efforts to educate pool owners and operators about compliance with the American Disabilities Act (ADA) by developing tools like our pool lift configurator and the educational website: poollifts.com.

ACCESS FOR ALL

S.R. Smith accessibility products include the Mobile Aquatic Chair (MAC), ADA compliant handrails and transfer bars, as well as a wide variety of fixed pool lifts — both anchored and portable. The pool lifts come in a number of styles including Hi/Lo models for facilities with in-ground pools and above ground spas, as well as Extended Reach models for pools with parapet or wide gutter configurations. Standard features on all models include a waterproof user hand control, rechargeable battery, footrest, seat belt assembly and our patent pending LiftOperator™.

COMPLETE CONTROL AT YOUR FINGERTIPS

The LiftOperator provides control of the lift from the pool deck by way of the touchpad, or with the hand control from the water. It features an emergency stop switch, an audible safety alert, a visual battery level indicator, a downloadable performance log and an optional activation key. Easy to use and maintain, the LiftOperator is a winner for swimmers and facility managers.

EDUCATION FOR ALL

Understanding what constitutes an ADA compliant pool can be a daunting task if you're not an expert. Fortunately, S.R. Smith is. And we share this expertise to help you find pool accessibility solutions that ensure your pools will be in compliance with the ADA regulations. So whether you're looking to become an ADA Accessibility Specialist, or simply needing to understand the basic product and installation requirements, we can help. Visit www.poollifts.com for more details.

SPECIFYING MADE EASY

S.R. Smith's Pool Configurator makes it easy to choose the lift that's right for your pool. When you provide basic information about your pool, this handy tool will show you the best lift options to suit your needs.
