

Will removing the Splash lift from service make my facility non-compliant with the ADA?

The Department of Justice’ published the following statement in relation to pool access on May 24, 2012 *“Title III of the ADA requires that places of public accommodation (e.g., hotels, resorts, swim clubs, and sites of events open to the public) remove physical barriers in existing pools to the extent that it is readily achievable to do so (i.e., easily accomplishable and able to be carried out without much difficulty or expense).”*

It is up to each facility to determine whether or not the ‘readily achievable’ provision applies to their location. Upon receipt of the replacement lift, it is important that facilities take prompt action to install the new lift to meet the guidelines of the ADA requirements. If a facility is in possession of a replacement lift and does not install it promptly, the facility could be at risk for not meeting the ADA.

How do I identify the lift affected?

The model number and serial number of the lift is located on the lower portion of the mast.

When will the replacement Splash Hi/Lo lift be delivered?

We are working with our suppliers to obtain the materials and ramp up production. We expect to begin shipping new lifts within the next few weeks. If you would like to receive updates regarding delivery schedule to your facility, sign up for email alerts at www.splashpalliftinfo.com.

If we inspect the lift, can we tell if the welds on our lift are done correctly?

Proper inspection of the lift requires extensive knowledge of pool lifts and how they are engineered. In order to ensure that the lift meets S.R.Smith’s manufacturing standard, we are providing a replacement that has been inspected by trained professionals.

Where can I get more information?

Please visit www.splashpalliftinfo.com to find information about the lift replacement procedure or contact our customer service team at (888) 497-9290, email splashpallift@srsmith.com.
