

WetDek Splash Pad Kit

The WetDek is part of the latest trend in zero-depth interactive water features that can be made into backyard splash parks, elegant fountain displays, poolside attractions or soothing water features designed for the landscaping

- Available in 6, 9, or even 12 jet kits
- Water spouts can be adjusted to spray water from a few inches to over 12 feet into the air
- The AquaDirector (control box) can be powered by any of the leading control systems, such as EasyTouch and Intellitouch
- WetDek is flexible enough that you can customize it for use in commercial applications. Check your local codes for requirements
