INTERACTIVE WATER FEATURES THAT INSPIRE

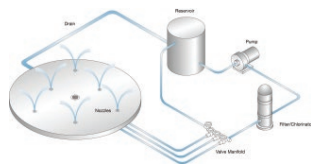

WetDek™ is a zero-depth interactive water feature system that can be shaped into a backyard splash park for the kids, an elegant fountain, a poolside attraction or a soothing water garden—you decide.

WetDek™ Backyard Splash Pad was voted one of the Top 50 Products of 2009 by readers of Pool and Spa News.

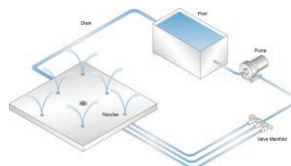

SOMETHING FOR EVERY BACKYARD

WetDek systems come in two main styles that offer flexibility and expandability. A stand-alone WetDek can be sized and shaped to fit virtually any backyard while the pool-side kit adds an extra element of fun to the pool. Each style offers multiple jetting configurations so that you can create your own personalized interactive water experience.

Stand-Alone Kit

Stand-alone kit includes jets, drain, water reservoir, inline chlorinator, filter, valves, pump, and AquaDirector control box. Everything you need excluding piping runs and surfacing material.

Pool Kit

Pool kit includes jets, drain, valves, and AquaDirector control box. Everything you need excluding piping runs and surfacing material.

AquaDirector—Water Feature Control System

With the AquaDirector Water control system you can manage your own custom built water feature. The system provides multi-voltage, multi-zone control and a host of interactive programs all in a single powerful package.

Commercial Applications

WetDek is flexible enough that you can customize them for use in commercial applications. Check local codes for requirements.
