

Mobile Platform Lift

A hydraulic driven platform, the S.R. Smith Mobile Platform Lift allows users to descend into the pool from an aquatic chair or from a standing position.

- Mobile platform lift with in-deck mounting points
- Electro-polished 316L stainless steel and high-density polyethylene construction
- Allows the user, using an in-built dual pressure control panel to independently descend into the pool
- It functions with the help of a hydraulic drive connected to the water supply (Minimum pressure 3 bars)
- Easy and quick to installation
- Simple user controls (from deck or on platform)
- Includes protective cover
- Foldable for storage
- Custom designed to suit any pool deck profile
- Typical design to accommodate overflow gutter (shown below)
- Patented and CE certified
- Guaranteed for 2 years
