

Pool Lift Configurator Widget

The pool lift configurator is hosted on S.R.Smith's dedicated web server, but can be customized with your company name, contact email address, and phone number for installation and use on your website. Instead of calling S.R.Smith, your customer will call or email you with their pool lift questions and purchases!

There are three customizable variables on the widget: company name, email address, and phone number. These have been highlighted in the code below:

```
<a  
href="javascript:void(window.open('http://www.srsmith.com/configurators-  
iframe/lifts.html?companyName=Company+Name&email=email@domain.com&phone=111-  
222-3333','configurator', 'width=856, height=667'));">  
</a>
```

Step 1. Change your company name where the text is highlighted "Company+Name." Use a plus sign (+) for a space, and do not use any apostrophes or other punctuation in your company name. Example: Joe's Pool Supply would be Joes+Pool+Supply

Step 2. Change the email address. This email address will receive all the submissions that come through the configurator, so you probably want it to be your pool lift expert, customer service or sales email.

Step 3. Change your phone number. This phone number will show on the configurator at all times, and will be the number customers will call if they have a question or get stuck. Do not use any parentheses.

Step 4. Copy the updated code and paste wherever you want it to appear on your web page. We cannot guarantee that the widget will work reliably in all browsers if other alterations are made to the code.
