UPGRADE YOUR OUTDOOR DÉCOR

Have you owned your pool for a long time? When you gaze across the water, look around the deck, or observe the sides of the pool, is something missing? Has your pool suddenly lost its visual appeal? If you answered "yes" to any of these questions, it may be time for an upgrade. A thoughtful and well-planned swimming pool upgrade can not only add value to your pool, it can transform the backyard into an eye-popping, relaxing sanctuary begging to be rediscovered. So when the time comes for an aquatic face-lift, here are some creative ideas worth considering:

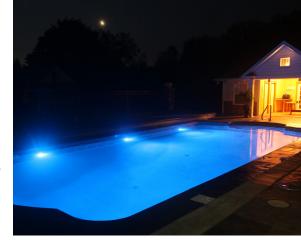

RAILS ADD STYLE

Upgrade traditional pool rails with modern, stylish Artisan and Meridian pool rails. Designed to retrofit existing pool rail anchors, the designer inspired rails bring functional elegance to the pool. It's a quick and easy upgrade that will make your pool the envy of the neighborhood.

SWAP FADING FIBER FOR VIBRANT LED

Pool lighting upgrades are a great, cost effective way to bring new life to your pool after dark. Fiber optic lighting was very popular from the late 1980's to the early 2000's. Over time, the fiber optic cable degrades and the quality of light becomes dimmer and less vibrant. Upgrading to LED pool lights is easy with Fiber to LED upgrade kits from S.R.Smith. The PT-6000 replaces the fiber illuminator and TREO, kelo or micro lights can replace the dull fiber lights. The transformation is dramatic!

UPGRADE YOUR SHADE

Sun shelves or ledges are a great way to enjoy the pool without making a splash. S.R.Smith offers a line of in-pool loungers and tables designed to stand up to salt, chlorine and sun. We even offer a table that is designed to retrofit existing sun shelf umbrella anchors. Available in 16" or 30" with optional cup holders, these tables, paired with our Destination Loungers, create great conversation spaces.

Pool upgrades not only increase the beauty of your pool, they also increase utilization. Even better — you just might fall in love with your pool all over again.
